

# What to do in the event of damage!

## GAS

*Immediately*

- Turn the motor off.
- Stop working.
- Do not operate any electrical systems. Use your mobile phone only at a safe distance.
- Secure the danger zone.
- Notify those in the nearby vicinity.  
„Don't ring the doorbell!“ – creates a spark.
- Notify the gas company.
- Alert the fire brigade.

## DISTRICT HEATING/WATER

*Soon*

- Clear construction pits and deeper areas of people.
- Block off the damaged area and any danger areas.
- Inform the water or district heating utility.

## ELECTRICITY

*Calmly*

- If possible, move the device out of the danger zone, swing it out or adjust the boom. Is not possible,
- don't leave the driver's cab until the power has been switched off.  
⚡ **Risk of death!**
- Tell outsiders to keep their distance.
- Do not touch the device.
- Inform the responsible utility company.

## Telecommunications

*Immediately*

- Inform the responsible utility company.
- Cover the ends of the fibre optic cables as much as possible.  
**Don't look inside!**

## In all cases

- The 5 Ws Who – What – When – Where – How  
**Then wait for responses about the nature of the damage or accident.**
